Outsourced Management of By-Products

Did you know that the management of by-products can be outsourced?

In almost all companies, by-products are handled with low priority and most companies cannot justify allocating people, time and resources to manage these lower value secondary streams.

In MBP, we have made the management of by-products our only business with a 24/7 laser focus on:

- finding the **best paying outlets**
- developing **new applications**
- identifying the most **sustainable solutions**
- ensuring that all uses are **legally compliant**

As a result, you will have more time to develop and manage your main business.

What is in the OMBP service?

"MBP Solutions has improved the value and distribution of our co-products through their world-wide distribution network. We greatly appreciate their service-oriented USA/North America office to provide local support for access to global markets."

David B. Wiley - Executive Chairman, Wiley Companies

MBP in the world

Who we are

MBP Solutions was founded in 1999, has been active in the US since 2015 and specialises in adding value to biological by-products through unique know-how regarding **product and applications, sustainability, sales and marketing, legal compliance and supply chain management**. We offer a wide variety of specialist services, including by-product collection, sales, distributions, storage, export, as well as a world-leading by-product management outsourcing service (OMBP). We focus on managing by-products from a production based on biological (non-fossil) raw materials and provide solutions for multiple industries, ranging from the oleochemical, biodiesel and omega-3 refining industries to companies that have other types of solutions, sludges and powders, such as breweries, starch manufacturers, pharmaceutical companies and manufacturers of nutritional ingredients.
