Biological by-products for tomorrow's environment

Solutions for a Greener, More Sustainable Tomorrow

Carbon Credits

Waste to Product

Green Energy

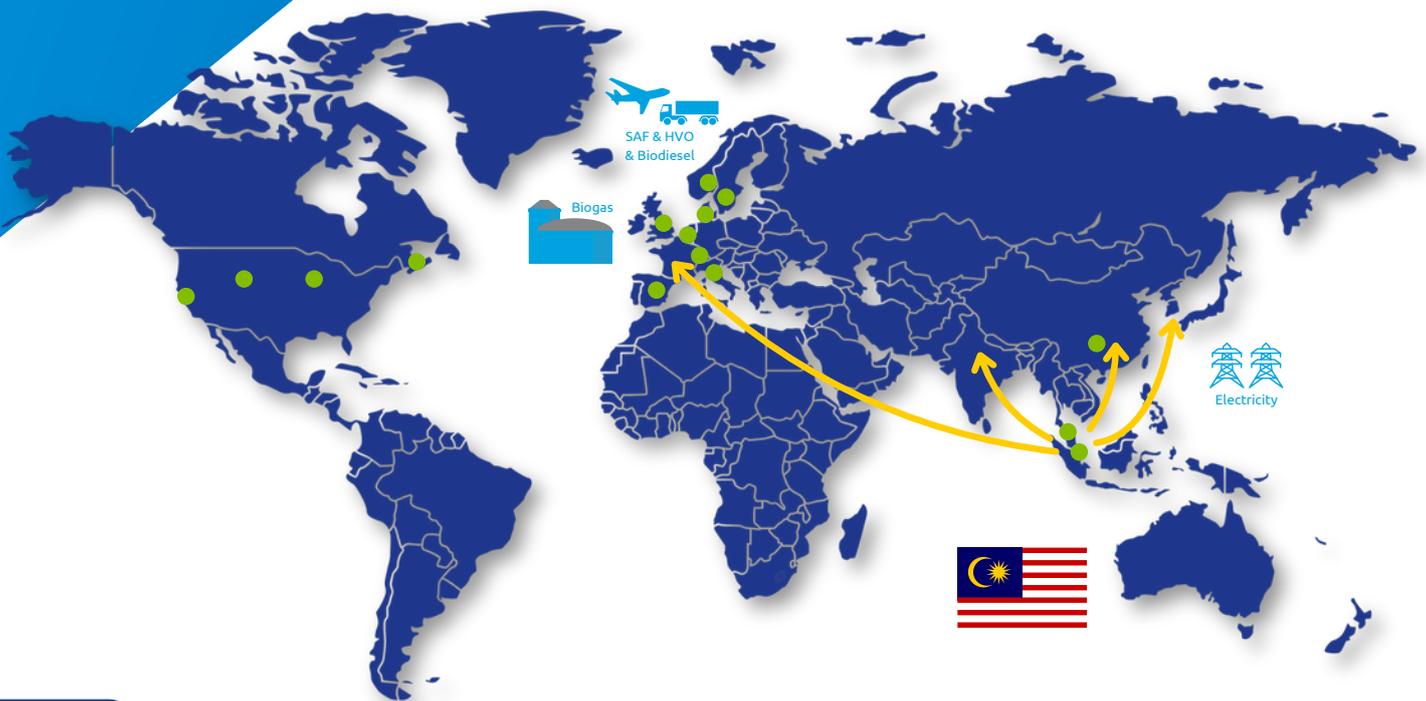

Scope 1, 2 and 3 Reductions

Our local Malaysian expertise combined with our global network are transforming by-product challenges into business opportunities.

- Revolutionising palm oil waste into Low Carbon Fertiliser for plantations
- Transforming FFB and EFB into green fuel for transport
- PKS into biochar for soil Carbon Sequestration
- Converting Palm Oil Mill Effluent to achieve greenhouse gas reductions

From Malaysia to the World
A Circular Economy in Action

MBP Solutions is your by-product expert, dedicated to adding value to by-product processes through sustainable practices, circular economy initiatives and the continual pursuit of innovative solutions to our global network.
