

E-lac

premium milk replacer for calves

Give your calves the best start with E-lac, a high-quality milk replacer based on easily digestible milk proteins. The product is developed for optimal nutrient absorption, high growth rates, and good health during the first weeks of life.

High milk protein content

Easy to dissolve and handle

Excellent palatability

Consistent quality

E-lac is a reliable choice for professional producers who will not compromise on quality.

E-lac

premium milk replacer for calves

SCAN ME

Its excellent solubility ensures a consistent mix without lumps, and the palatable composition promotes high feed intake from day one. E-lac is suitable for modern calf production focused on growth and well-being.
